DAILY POTATO REPORT NO. 123.

EARLY IRISH POTATOES (Acreage and indicated production 1943, with comparisons)
(Commercial Truck Crops for Shipment, Jan 9, 1943)

Production of fall and winter potatoes in south Florida and Texas this season estimated at 2,020,000 bushels compared with 1,690,000 bushels last season and the 10-year (1932-41) average of 1,188,000 bushels. Acreage was increased in Florida more than enough to offset a reduction in Texas, and yields are indicated to be relatively high. Digging has started and supplies should increase during January. Growers report that they intend to plant 27,800 acres of potatoes in North Florida and the Lower Rio Grande Valley of Texas for harvest beginning in March. This compares with 23,400 acres harvested last season - an increase of 19 percent.

U.S. DEPT. OF AGRICULTURE POTATO ANNOUNCEMENT

To encourage growers to increase Irish potato production for wartime requirements, the Department of Agriculture today announced it will support potato prices in 1943 at a level equivalent to 92% of parity.

A production incentive payment program also will be operated in conjunction with the price support program in encouraging this increased production.

Under the incentive payment program growers will receive 50¢ per bushel on the normal yield of the acreage planted to potatoes in excess of 90% of their individual farm goals, up to 110% of the goals. This incentive payment applies only to acreage planted after Feb. 1, last, but the price support applies to all potatoes harvested after March 1.

The support program will be similar to that in effect in 1942, and will involve direct purchases, loans, and diversions, as circumstances require. Price support operations will be confined chiefly to the commercially-important producing areas which account for over 80% of the total U. S. production.

It is believed effective support for this large volume automatically will stabilize the market for all potatoes. It was pointed out, however, the marketing situation in all areas will be closely watched and that operations will be extended to other areas if necessary.

Price support operations will undertake to assure average returns but sales by an individual are guaranteed only to the extent of participation in the program. Every effort will be made to assure growers an equitable share of the F.O.B. prices.

Purchases will be made by the Food Distribution Administration at the scheduled support prices designated for U.S. No 1 grade, and at 10¢ per cwt less for potatoes grading 85% U.S. No. 1 quality. Loans to potato growers through the commodity credit corporation will be made on the basis of the scheduled prices for U.S. No. 1 grade, with appropriate differentials for differences in location and storage conditions.

SHIPPING POINT INFORMATION FOR WEDNESDAY, FEB. 3:

WAUPACA: (And Other Wis. Points) Demand moderate. For best stock, market firm at ceiling prices, for other stock, market steady. U.S. DEPT. OF AGRICULTURE ANNOUNCEMENT

Secretary of Agriculture, Wickard, today announced a program of special aid to farmers to encourage additional production of specified war crops and to insure producers against loss including high risk crops or crops they would not otherwise grow.

The aid will be in the form of "special war crop advances", to be extended through county war board and the regional agricultural credit corporation of the farm credit administration.

Farmers making extra efforts to grow vital war crops and assuming added risks will sign a special form of note limiting repayment obligations, to the value of the crops produced, provided certain requirements are met. These include a finding by the county war board the farmer has used the money in the production of crops for which it was advanced; that he diligently applied the principles of good farming to the production of the crops; that he has harvested the crops to the extent of his ability, and that he has applied the full proceeds of such crops to the repayment of the advance.

The following crops were specified for the special advances; soybeans for beans, flax for seed or fiber, peanuts to be harvested and picked; POTATOES where the farm goal is 3 acres or more; Sweet potatoes on farms with goals determined; American-Egyptian cotton hump for seed or fiber, dry beans, dry peas, excluding wrinkled varieties castor beans, tomatoes, snap beans, lima beans, peas, carrots for processing or sale fresh; and cabbage, sweet corn, and table beets, for processing only.

Undertone weak, however, with quotable top around 15.75; Shippers took none. Compared
week ago: Good & choice Barrows, Gilts & Sows 20-30¢ higher.

CHICAGO CATTLE: Compared Friday last week: Very active, sharply higher market on all
classes; Fed Steers & Yearlings 25-50¢ up, med. to good grades showing most net
advance even after weakening late; Top at 17.40 second highest on record for March,
year highest price 17.35; Best Yearlings 17.20, Heifer Yearlings 16.25; Bulk Steers &
Yearlings 14.60-16.50, kinds closing at 15.50-16.50 showing most advance; Heifers
mostly 50¢ higher; Strictly choice offerings absent, low-choice Heifers topping at
16.25, odd head 16.75, bulk 13.00-15.50; Good grade beef Cows 25¢ higher, reaching
14.00; All others 25-50¢ up, weighty Cutters advancing to 10.75; Most common and
medium Beef Cows 11.25-12.50, Cannons 9.00 down; Bulls largely 50¢ higher, heavy
Sausage offerings selling freely late at 14.25; Vealers strong at 16.00-17.50; Stock
Cattle advanced 25¢ in sympathy with killers, supply small, practically everything
fleshy going on killer account.

NOTICE: The plan of allocating nails and wire for assembling fruit and vegetable containers is being changed by the War Production Board from the preference rating plan to the controlled materials plan. All packers and shippers who use more than 4,000 pounds of nails during a quarter must secure a rating. Those who have been obtaining these supplies under PRP and have not filed CMP applications may continue to obtain nails and wire under PRP the second quarter by using rating pattern assigned for the first quarter. Those who did not obtain these supplies under PRP during the first quarter must file an application form CMP-4B immediately to secure allotment numbers and quota in order to get nails and wire. These forms are obtainable at local WPB offices.

CHICAGO ONIONS FOR WEDNESDAY, MARCH 10: Track 7. Arrivals: Minn 2, WIS 2, Diverted 1. Supplies very light including track receipts. DAILY POTATO REPORT NO. 176.

EXCERPTS - TRUCK CROP NEWS - POTATOES - released March 20, 1943, BAE, USDA, Washn. D.C.

COMMERCIAL EARLY POTATOES: Harvest of the Dade County crop in Florida is about 75 percent completed. Yields are reported to be off a little but quality remains good. Various reports of the extent of the freeze damage to north Florida potatoes have been coming from growers. Some early plantings are gone completely and part of the crop in the Hastings area has been frozen back three times. Many fields are showing a poor "come back" at the present time and it still remains to be seen just what the final damage will be. Some report that the crop will be three weeks later than usual and yields will be cut as much as 50 percent. Part of the LaCrosse acreage was also frozen back to the ground.

In Texas, potato crops are in generally good condition. The Lower Valley crop was well advanced when the early March cold spell occurred, but damaging temperatures did not reach into this area. Crops have been retarded slightly by the numerous cool spells during the growing season, but delay in harvest is not expected to be more than a week to 10 days. Harvest should get under way the early part of April but the usual early rush will not take place because growers will hold for increased yields. Good progress in planting is being made in areas outside of the Lower Valley. Crops in the early district around San Antonio were not advanced enough to be damaged by the recent cold weather. Moisture and soil conditions were favorable for planting in the Eagle Lake-Wharton section and potatoes are just coming up. Planting in the later districts of "other Texas" is just getting under way. Most of these districts received rainfall recently and a material increase in acreage is planned. Present temperatures are too cool for immediate extensive planting but conditions are more favorable than on this date last year.

Early potatoes in the Edison district of Kern County, California, have made good progress during the past month and it is quite probable that some acreage will be dug in this area about April 10. The start of harvest may be delayed in order that growers may gain in tonnage and yields. In the Shafter area in Kern County, most of the field have been wet from rain and usual progress has not been made to date.

CARLOT POTATO SHIPMENTS IN THE ENTIRE UNITED STATES, MONDAY, MARCH 29:
